

TIMO BAWARE MERES

Informatics Student | AI & Web Developer

EDUCATION

Bachelor of Informatics

Klabat University
2023 – Present

Areas of Interest

- *Artificial Intelligence
- Large Language Models (LLM)
- Web Development

PROJECTS

Fake News Detection System

Python, BERT, Gemini API

- Built an NLP-based fake news detection system
- Used BERT and Gemini API for text analysis

AI Mental Health Chatbot

ngrok API, Railway

- Developed a web-based AI mental health chatbot
- Integrated API communication using ngrok
- Deployed application online using Railway

Breast Cancer Detection System

Python, TensorFlow, Flask, Gemini API

- Developed an AI-based breast cancer classification system
- Implemented Deep Learning using InceptionResNetV2 and CBAM architecture
- Built web application using Flask

AutoDeals Showroom Management System

Laravel, MySQL, Tailwind CSS

- Developed a used car showroom management system
- Built vehicle inventory and stock management features
- Implemented authentication and dashboard system using Laravel

Game Development Projects

Unity C#

- Developed simple interactive games including Roll Ball Game and Simple City Parking Game
- Implemented gameplay mechanics, player controls, obstacle systems, and scoring features

Certifications

Laravel Web Development Certificate — Eduwork

- Completed Laravel web development training program
- Learned backend development, authentication, database management, and REST API integration

ABOUT ME

Hi, I'm Timo, an Informatics student who loves building creative and interactive digital experiences. I have a strong passion for Web Development, especially backend development using Laravel, while also enjoying exploring modern technologies like AI and game development with Unity. I enjoy turning ideas into functional and engaging applications through coding and problem-solving. Curious, adaptable, and always eager to learn, I continuously improve my skills by working on personal and academic projects. I believe technology should not only work well but also create meaningful and enjoyable experiences for users.

TECHNICAL SKILLS

- Backend Web Development
- Laravel Development
- Front-End Development
- AI Chatbot Development
- Unity Game Development
- Large Language Models (LLM) Basic

Languages

Indonesian -Native

English - Intermediate
